UNDER WHICH IT OPERATES.

ITS ORIGIN AND OBJECTS.

The American Society for the Prevention of Cruelty to

Animals had its origin in the exertions of one of its most

prominent members, who, during a late residence in Europe,

in the Diplomatic service of the Government, became aware

of the great advancement which had resulted through the philanthropic

action of a similar Society which had been in existence

in England for nearly 50 years, extending its influence to

various other portions of the globe with similar results. Prior

to the enactment of certain statutes by the British Legislature,

in 1822, the treatment of animals in Great Britain was very

barbarous. Ignorance, thoughtlessness, heedlessness, or wanton

brutality occasioned an innumerable amount of pain to the

patient brutes, upon which the humane efforts of a few benevolent

individuals had little effect in mitigating these gross and

degrading practices. It was not until the organization

of the Society of which we speak in 1824, that any considerable

and united effort was made in behalf of dumb animals,

and the great success which has attended its action

led to the formation, last Spring, of the kindred Society in this

country, which, with its headquarters in this city, has already

in this brief period proved the necessity of its existence, by

the large amount of good which it has already achieved.

It is modeled entirely upon its English associate.

Able officers and conducted by gentlemen of refinement, and

earnestly interested in the furtherance of its objects.

The organization of the Society in England, viz., the

circulation of tracts and the raising of funds, is the

chief means of its success. The introduction into our

schools, by books and lectures, of the principles of humanity

to the brute, and the raising of funds, is the
